SGW launches the worlds first Home Media Center Cordless Home Phone for Android™ at CES 2010

CES Las Vegas, January 7th 2010 sees the launch of the world's first Home Media Center Cordless Home Phone for Android™. Designed and manufactured by SGW in collaboration with Curventa and DSP Group this beautifully crafted state-of-the-art WiFi device will change home communications forever. Featuring a stunning 3.2" touchscreen using Android OS, it features a full Internet browser for accessing applications such as Youtube™ and Google™. The “always on” device supports RSS widgets such as local news, sports and weather. Incorporating DLNA, it allows users to control and stream their media, such as videos and music, around their home to the TV and PC.

Featuring WiFi, Remote Control IrDA, USB 2.0, SD/MMC card, the latest CAT-iq 2.0 DECT is also on-board for HD voice calls over landline or VOIP systems. This device is a real family multi-media center constantly able to be loaded with all the latest applications from Android Market.
